DESIGN NOTES

A review that ends with a decision

Six prompts for product, engineering and design

Rupesh Kumar

DESIGN NOTES

Put one decision at the top

1. Name the choice this meeting should help make.
2. State who is responsible for making it.
3. Share the material people need before the meeting.

DESIGN NOTES

Read the customer task

1. Explain who is trying to do what, and when.
2. Show the evidence behind the problem statement.
3. Check that everyone is reviewing the same task.

Describe the proposal

1. Show the steps the customer would take.
2. Explain why those steps are there.
3. Name the constraints the proposal responds to.

DESIGN NOTES

Keep assumptions visible

1. Which part of the proposal has not been checked?
2. What could make this approach unsuitable?
3. What would we need to learn before committing?

Make feedback specific

1. Name the step your feedback concerns.
2. Describe the problem you think might happen.
3. Suggest evidence or a test that could resolve it.

Close with a written next step

1. Decision or open question: [write here]
2. Next action and owner: [write here]
3. Evidence and review date: [write here]
