Redesign intake sheet.

Name the decision before changing the screen.

PRODUCT / FLOW

DATE / OWNER

01 THE MOMENT

Who is trying to do what?

Person

Task

Where does progress break?

02 THE EVIDENCE

What did someone do, say or fail to find?

Keep the observation separate from your explanation.

Source / date

03 THE DECISION

Which choice could make this moment easier?

Uncertain? Record the missing evidence before choosing a redesign.

THE REQUEST

Redesign checkout.

A broad request. A narrower decision.

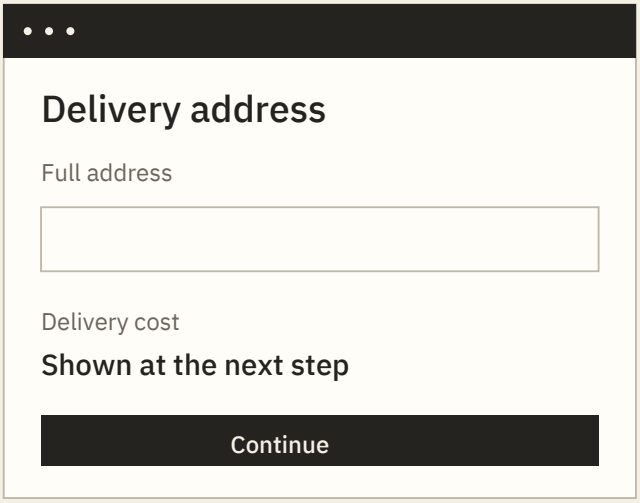

Possible evidence

A person pauses when delivery cost appears only after the address step.

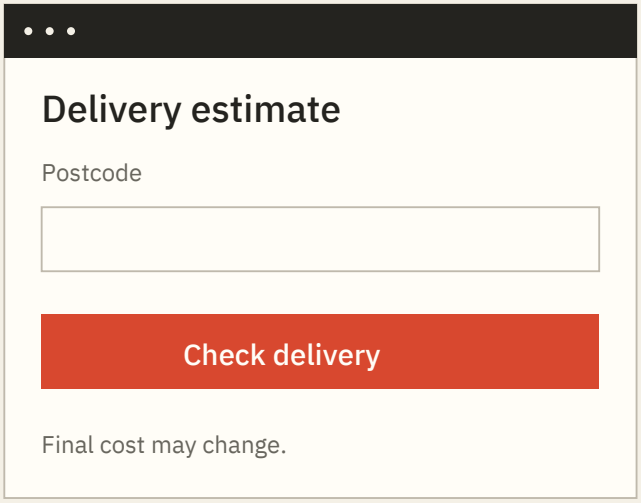

Question to settle

Can they check delivery before giving a full address?

CURRENT RULE

PROPOSED RULE

THE CHOICE

Bring the delivery check forward.

If a postcode can give a useful estimate, ask for that first.

The cost

An estimate can change. State that limit clearly.
If a full address is required, explain why before asking.

Choose the smallest change.

Follow the evidence. More than one cause may apply.

Where is the mismatch?

01

Meaning ☐

A person cannot tell what a label or action means.

Change the words or information order.

02

Behaviour ☐

The action does something different from the expectation.

Change the rule, state or interaction.

03

Consistency ☐

The same state looks or behaves differently elsewhere.

Align the component and its usage rule.

THE NEXT MOVE

One change to try

What should become easier to do?

What stays unchanged?

Who will check it?

Use observed behaviour to judge the change. Appearance alone is incomplete evidence.
