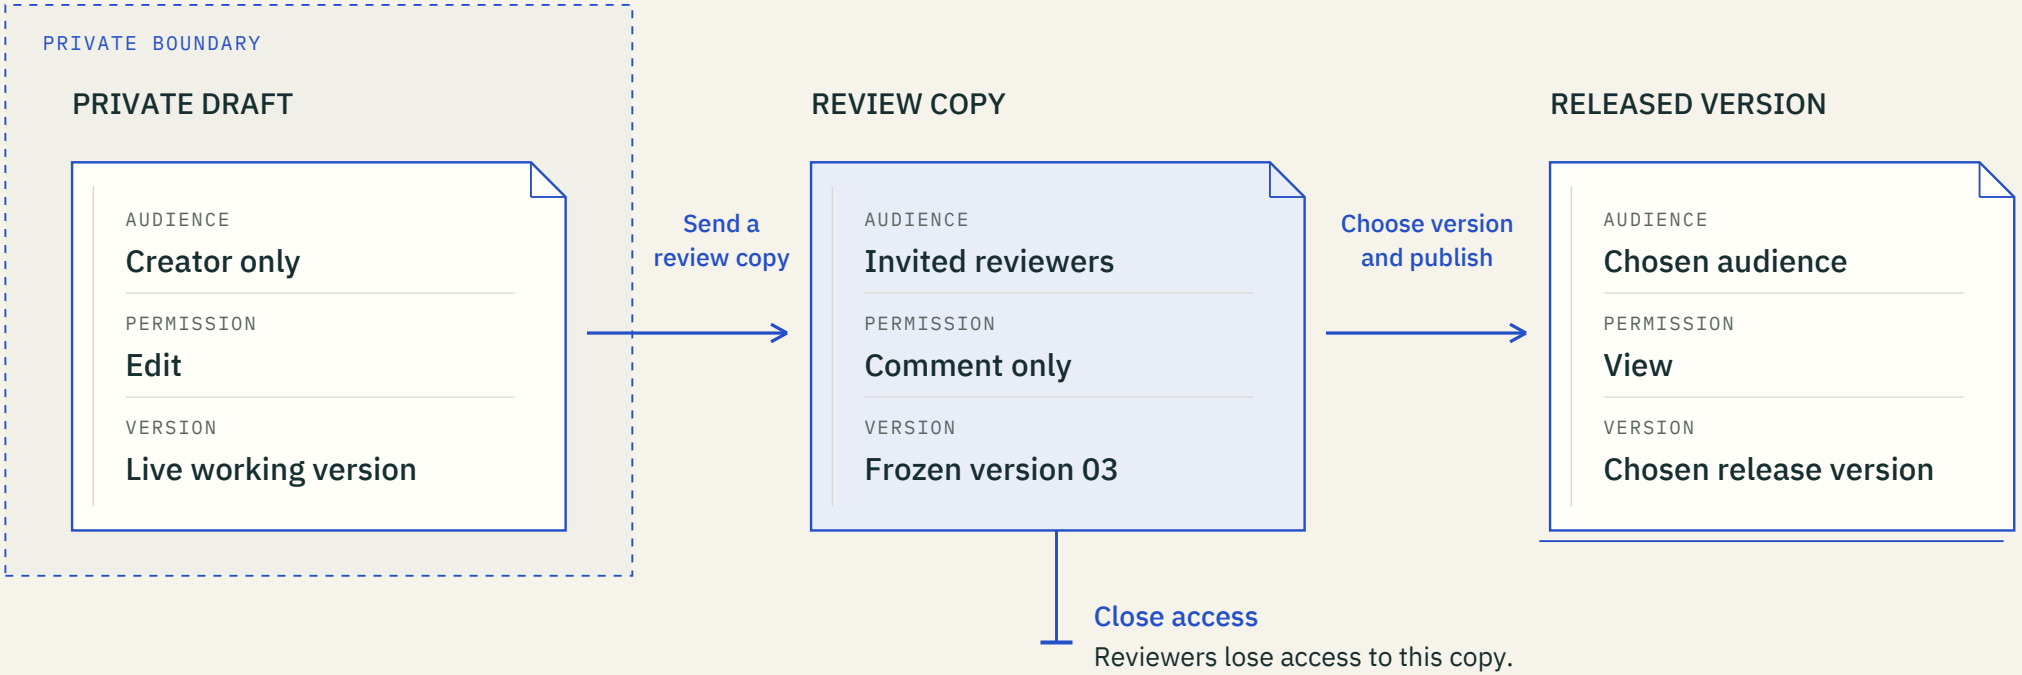
Draw the boundary before the Share button.

A sharing-state map for product teams.

A completed example

Hypothetical review tool. The creator wants comments while the work is still changing.



Limit: closing access cannot recall screenshots or downloaded files.

THE RULE

Private edits stay private until the creator sends an updated review copy.

THE COST

The reviewer can fall behind the current draft. Show which version is open.

Map your own sharing decision.

Use the example as a reference. Choose rules that fit your own product.

Before sharing

What is private?

Who owns the working version?

At the handoff

Who can see it?

What can they do?

Which version do they receive?

After sharing

What changes automatically?

How does access stop?

What might already have been copied?

For _____ , sharing _____ lets _____ do _____ with version _____

Rule we must settle before the next mockup: _____
